Prometheus Prime MVP Developer Checklist

Core Layout & Navigation

[ ] Home Dashboard with navigation

[ ] Sidebar or Top Nav: Routine Planner, Prime Reflection, Task Manager, Settings (optional)

Routine Planner

[ ] Daily routine input blocks (Morning, Afternoon, Evening)

[ ] Add/Edit/Delete routine items

[ ] Save to Local Storage

[ ] Display saved routine with timestamps

[ ] Optional: "Motivate Me" button with GPT call for encouragement or reflection

Prime Reflection UI (Prometheus Mirror)

[ ] Input field: 'What's on your mind today?'

[ ] Submit button: Saves reflection to local memory

[ ] Show most recent reflection

[ ] View log of past reflections with timestamp

[ ] Style section with rounded cards, shadow, and dividers

Task Manager Basic

[ ] Add New Task (name + optional due date)

[ ] Checkbox for completed tasks

[ ] Delete task

[ ] Store tasks in Local Storage

[ ] Filter: All | Active | Completed

Voice-to-Reflection Input (Basic Mode)

[ ] Mic Button to initiate voice input

[ ] Speech-to-text field (using browser speech API)

[ ] Real-time transcript display

[ ] On 'Stop', automatically populate Reflection field or Task input

Memory Recall (GPT Integration Placeholder)

[ ] Temporary button: 'Summarize last 7 days'

[ ] Simulated GPT response (static or manual summary until memory API integrated)

Styling & Theme

Prometheus Prime MVP Developer Checklist

[ ] Dark base theme (Slate, optional switcher later)

[ ] Rounded buttons

[ ] Shadow box accents

[ ] Soft hover effects on clickable items

Functional Testing

[ ] Full run-through of all navigation links

[ ] Add and retrieve routines, reflections, and tasks

[ ] Check for blank-state handling

[ ] Reset/Clear all data function (optional for MVP)

Optional MVP Extras

[ ] "Daily Verse" or Quote box (static or GPT-inserted)

[ ] Motivation toggle: Random encouragements on page load

[ ] Quick Notes module (scratchpad)
